Carolinas Energy Associates helps Continental Tire’s Sumter plant find energy savings with Energy Treasure Hunts

Service/Product Provider Company Overview

Carolinas Energy Associates, LLC provides Energy Treasure Hunt training, tool kits, and facilitation for Industrial facilities that want to save energy (up to $500,000+ per event) and reduce greenhouse emissions.

Project Scope

Continental Tire retained Carolinas Energy Associates (CEA) to lead an Energy Treasure Hunt at its Sumter South Carolina plant to identify energy saving opportunities. The plant had registered for the ENERGY STAR Challenge for Industry and was seeking ways to identify energy saving opportunities.

Project Summary

Continental Tire Sumter Plant was established in 2011 and produces premium lines of passenger and light truck tires. Following the ENERGY STAR Treasure Hunt guidelines, the pre-training day and 3-Day event took place with 18 employees trained by CEA. Savings opportunities were found in all areas of the plant such as motor drive systems, steam and compressed air systems, heat exchangers, fans and more. CEA helped the teams quantify and calculate savings opportunities and created an action plan that included renewable energy considerations.

- Energy Savings
  Potential savings of $250,000/year (3,709,000 KWh/year) and 2,629 Metric Tons of CO2e/year.
- Investment
  $205,000 total implementation.
- Financial Return
  10 months payback overall; many measures had immediate payback.
- Other Benefits
  Enhanced employee engagement, awareness, and movement toward corporate Sustainability goals.

Monitoring & Verifying Energy Savings

The plant tracks its overall monthly energy performance and progress towards its ENERGY STAR Challenge for Industry goal of a 10 percent energy intensity reduction within 5 years.

Distinguishing Value

Carolinas Energy Associates, LLC utilized their energy management expertise of Energy Treasure Hunts to successfully train employees and facilitate the 3-Day Event which enabled Continental Tire, Sumter Plant to identify significant potential energy savings and greenhouse gas reductions.
