

FIND THE TREASURE X IN YOUR FACILITY

An ENERGY STAR® Treasure Hunt Can Help Reduce Energy Use by up to 15 Percent

Hundreds of organizations across the country are using treasure hunts to discover hidden savings in their buildings and facilities. You can, too!

HOW IT WORKS:

Treasure hunts bring new perspectives to a facility to identify quick fixes with a short payback period. The core of an energy treasure hunt is an on-site one-to-three day event in which diverse teams—from onsite facility staff and occupants to outside experts and specialists—look for day-to-day operational improvements.

START PLANNING TODAY AND GET READY TO:

- Cut out energy waste and **save money** on your utility bills.
- Earn recognition from the EPA for your **environmental leadership**.
- Collaborate with your team members and **boost workplace pride**.
- Deliver **value to tenants** in the form of a more efficient workplace.
- Achieve **lasting benefits** for your bottom line.
- Save time and effort** with EPA-provided resources!

GET RECOGNIZED FOR YOUR EFFORTS

Join us as we “open the treasure chest” by submitting a summary of your treasure hunt findings. Participants will:

- Be featured in a weekly email to ENERGY STAR stakeholders,
- Receive a printable certificate noting their contributions, and
- Be included in an EPA press release at the campaign’s conclusion.

START PLANNING YOUR TREASURE HUNT TODAY!
