How to Respond to the 2015 National Building Competition Data Request

EPA will make three data requests over the course of the competition, requesting baseline, midpoint, and final building data. You will access each request via a unique hyperlink (see page 2) that takes you to Portfolio Manager where you can use these instructions to respond to the data request.

Responding to a data request is different from sharing a property with a contact because when you respond to a data request, you release only the information specified by the requestor for the designated time period.

When you submit building data in response to this request, you will be submitting the following metrics to EPA. EPA may publish the metrics indicated with asterisks and will also calculate and publish water use intensity (kgal/square foot) for those buildings competing in the “Energy and water” portion of the competition.
