

Utilities Providing Energy Data for Benchmarking in ENERGY STAR Portfolio Manager

The simple choice for energy efficiency.

September 2019

As energy benchmarking becomes standard practice in the commercial building industry, owners and managers of buildings are seeking to simplify the process of obtaining utility data. In addition, as the EPA's ENERGY STAR Portfolio Manager® has become the tool of choice for most organizations to benchmark their energy and water performance, these owners and managers are also looking for ways to streamline the entry of utility data into the tool. The good news is that more and more utilities are stepping up to assist owners and operators by making aggregate whole-building data readily available, and by enabling customers to have their data sent automatically into their Portfolio Manager account via web services. The result: customers spend less time gathering and inputting data and more time working on saving energy; and utilities are better able to understand the characteristics and energy performance of their customers' buildings, thereby allowing for more targeted identification of energy savings opportunities.

This document provides a complete listing of all known utilities providing customers with streamlined access to energy benchmarking data, which is defined as either the provision of aggregate, whole-building data in spreadsheet format, and/or the delivery of data directly into customers' Portfolio Manager accounts via web services. While many utilities provide individual customers with online access to historical energy consumption data at the account level, such services are not captured in this document unless they entail the provision of aggregate, whole-building data and/or the use of Portfolio Manager web services.

Utilities Providing Energy Data to Commercial Customers to Assist with Benchmarking in Portfolio Manager

State	Utility Name	Aggregate Whole-Building Data? ¹	Multifamily Included?	Format	Contact Information
AZ	Salt River Project	No	No	Web Services	abssupport@srpnet.com
CA	Los Angeles Department of Water and Power	Yes (commercial buildings – 3; multifamily properties – 5)	Yes	Web Services	usagedata@ladwp.com Click here for more information
CA	Pacific Gas & Electric	Yes (commercial buildings – 3; multifamily properties – 5)	Yes	Web Services	benchmarking@pge.com Click here for more information
CA	Pacific Power	Yes (5)	Yes	Web Services	portfoliomanagersupport@ems.schneider-electric.com Click here for more information
CA	Sacramento Municipal Utility District	Yes (commercial buildings – 3; multifamily properties – 5)	Yes	Web Services	benchmark@smud.org Click here for more information
CA	San Diego Gas & Electric	Yes (commercial buildings – 3; multifamily properties – 5)	Yes	Web Services	benchmarking@sdge.com Click here for more information
CA	Southern California Edison	Yes (commercial buildings – 3; multifamily properties – 5)	Yes	Web Services	benchmarking@sce.com Click here for more information

¹ The numbers in parentheses signify the minimum number of tenants or accounts in a building required for the utility to provide aggregate data without explicit authorization from individual tenants. If there are two numbers (X/Y), the second number indicates the maximum percentage of total energy consumption allowed by a single tenant/account in order for aggregate data to be provided without tenant authorization.

State	Utility Name	Aggregate Whole-Building Data? ¹	Multifamily Included?	Format	Contact Information
CA	Southern California Gas	Yes (commercial buildings – 3; multifamily properties – 5)	Yes	Web Services	SCGBenchmarking@semprautilities.com Click here for more information
CO	Xcel Energy	Yes (4/50)	Yes	Web Services	benchmarking@xcelenergy.com Click here for more information
